

Using a 55-58 motor driver chip and Field-Oriented Control (FOC), the RoboMaster C630 Brushless DC Motor Speed Controller enables precise control over motor torque.

Exclusively designed for the RoboMaster series P18 Brushless DC Motor and C630 Brushless DC Motor Speed Controller, the L3300 Armature Kit includes a motor, cables and a terminal board.

Refer to System Specification Manual, RoboMaster User Manual, Introduction of RoboMaster System Module

The M8000 Armature Kit includes a motor, cables and a terminal board, creating a complete armature system chain for four independent motors.
